

Towards New Horizons

Reduce the hidden costs of strategic incoherence.

SPIRIT FOR FUTURE

HENRIK LANGHOLF

A 2-day highly interactive strategic lab
for leaders & teams navigating complex transitions

Are you and your team facing complex challenges *towards new horizons*, where you are seemingly stuck?

Then this is for you!

Where more analysis leads rather to paralysis than to momentum, it's time to start something new: **Welcome!** Over two days, we work with **the real challenges** of your team or whole company — case-based with Live-insights from ***Systemic Innovation Constellations™***.

Systemic Innovation Constellations™ are a structured approach that reveals what usually remains invisible in innovation, strategy and change processes: **relationships, tensions, hidden blockages, untapped potential.**

Every innovative move depends on a fertile social field of internal and external stakeholders. If essential relationships in this field feel stuck or in any other way “not really happening”, even the best ideas and concepts will not work.

With the help of *Systemic Innovation Constellations™*, this field can be experienced and explored, with high relevance for business decisions and a more effective use of resources.

We work on issues related to roles, responsibilities & future readiness in three horizons

1st Horizon: 0 – 2 years

- Which immediate challenges in innovation, technologies, investments, governance, cooperation etc. need **more management attention now**?

2nd Horizon: 2 – 5 years:

- Which innovations in products, processes and business models that are supposed to be in place in two to five years from now need **more entrepreneurial spirit** in order to really progress?

3rd Horizon: 5 years plus:

- Which trends as well as learnings from future & market scenarios need **more attention and better integration now**, in order to not lose sight?
- What is **the magnetic vision** to focus on, even in times with high geopolitical and supply chain uncertainty?

Leave with clarity, strategic alignment and next moves towards your new horizons!

Inquire for a tailored in-house format.

“When a complex system is far from equilibrium, *small islands of coherence* in a sea of chaos have the capacity to shift the entire system to a higher order.”
Ilya Prigogine, Nobel Laureate
